I oppose SB 1110, 1115, 1116, 1117, & 1118.

Carla was the victim of a blatant case of medical malpractice by both the radiologist and the general practitioners that she had treated with. Because of her doctor's negligence she will be missing out on many years of life that would be spent with me, her four children, and potentially, grandchildren. Because the doctors whom Carla entrusted her life to did not display the professionalism owed to their patient and the profession in general, she has been forced to miss out on life experiences no parent should have to miss. Had the doctors done their due diligence when treating Carla, she would be looking forward to making plans on how to spend the rest of our lives together.
